Beautiful Double Herbaceous Peonies

The wonderful improvements made during recent years in these old fashioned hardy plants have made them immensely popular. After they are once planted, they require little attention and care, thriving almost anywhere, and are absolutely hardy everywhere, requiring no protection whatever, even in the most severe climate. They do best in good, rich soil and an open, sunny position, but this is not absolutely necessary. They like a liberal supply of water during their growing season. The abundance and wealth of the gorgeous flowers which they produce are sufficient to satisfy the most enthusiastic, their flowers rivaling the finest. Roses in size, form and coloring. They are not troubled with insect pests or diseases of any kind, and, once planted, they take care of themselves, increasing in beauty each year. We offer herewith some of the newest and most beautiful varieties in cultivation.

IMPORTANT NOTICE—Peonies should be planted in the early fall. While Peonies can be and are planted at all times throughout the fall and spring months, there is no question about fall being the best time for setting out the roots. If planted out during the months of September and October, or even November, the result will be good blooming plants the following June.

The Old-Fashioned Peonies of Our Grandmothers’ Gardens

These three varieties represent the best in free, early flowering and reliable kinds.

OFFICINALIS ROSA—(Illustrated on front of cover.)
Deep cerise pink; very striking. Price, 25 cents each.

OFFICINALIS ALBA—Pure white; large and full flower. Very popular for cemetery planting. Price, 25 cents each.

The above three Peonies in strong plants (if planted by November, will flower next spring) for 60 cents, postpaid.

The Best Novelties in Colors—Crimson, White, Bright Pink and Light Shell Pink

ALL EARLY-FLOWERING. IF YOU WANT THE BEST, HERE THEY ARE

The following four varieties we offer as the best grown in the different colors and are not to be excelled by any other kinds in the Peony family. Apparently they are expensive, but the superior quality of these four named kinds over other standard varieties of this popular plant is greater than the difference in quality, in any other family of flowers.

FESTIVA MAXIMA—This is not only the finest white in existence, but, in most quarters, is regarded as the queen of all the Peonies. Mr. Harrison says: “This flower has reached the ultimate, beyond which we cannot go.” It combines enormous size with wondrous beauty, often 7 to 8 inches in diameter; color snow-white, flecked with an occasional clear purple spot on the edge of center petals; in addition it is very fragrant. Price, 50 cents each.

GIGANTEA—This is one of the rarest and most sought after in cultivation. The finest of all Peonies for cut flowers purposes. If it is one of the earliest to bloom, produces an enormous flower 6 to 7 inches in diameter, on long stems; deliciously fragrant. Price, $1.25 each.

FELIX CROUSSE—All Peony enthusiasts are familiar with the fact that it is difficult to get a red Peony that is a solid color—that is, a full, rich, even shade of red without being suffused with a shade of another color. Felix Crousse fills the bill. A rich, even, brilliant ruby-red, exceptionally fiery, bright and effective; very large, full bell-shaped bloom. Unique in color. Price, 75 cents each.

MARIE STUART—Large bloom, coming in clusters; outer petals soft pink, center pink and sulphur-white; very chaste bloom. Please everybody. Price, 50 cents each.

SPECIAL OFFER!

One each of the best of Novelties, Felix Crousse, Festiva Maxima, Gigantea and Marie Stuart ($3.10 value), for $2.80. One of our best offers.

SPECIAL OFFER! One each of the Peonies on this page for $4.75. Peonies should be sent by express, as stronger roots can be sent in this way.
OUR COVER ILLUSTRATIONS

McGregor's Improved Fringed Primroses
As illustrated in color on front of cover.

There are many species and varieties of Primulas, all of them charming free-flowering plants, and most of them extensively cultivated. Perhaps the prettiest, as also the best known type, is the Chinese Primrose, one of the best house plants in existence. All of its numerous varieties furnish beautiful material for pot culture and most tractable and reliable plants for indoor treatment. The same may be said of Primula Obconica, a variety of later introduction. Its heads of finely formed flowers, ranging in color from the purest white to deepest carmine, are produced in great numbers and under the easiest of cultures. Another superb variety for house culture is Primula Forbesii or the Baby Primrose, a very dwarf, unique sort, but the freest flowering of all Primulas, sending up countless tiny flower spikes all through the winter months. All the varieties named above are not hardy, and are chiefly grown in and for the conservatory, greenhouse and dwelling room. The improved strain of fringed Primroses which we have illustrated in colors, are the largest flowering and most striking that has yet been produced, and we have no hesitancy in recommending them highly.

SUTTON'S DUTCHESS—Beautiful pure white with yellow eye.
ORANGE KING—Color, rich orange-salmon shaded terra cotta.
MT. BLANC—Pure white flowers, heavy green foliage.

Price, 15 cents each, any three for 30 cents, or the full set of six for 50 cents, postpaid.

DUTCHESS RED—Rich fiery red with deeper crimson zone.
CHESWICH RED—Rich deep rose, a fine flower.
KERMESINE—Bright carmine with yellow eye, fine.

Price for larger plants for immediate flowering, 25 cents each; any three for 60 cents; the set of six for $1.00.

NOTE—The Star Primroses we offered last season, the strain of which had been much heralded by the English producers, failed to come up to our expectations. While showing good ideas of color we are afraid the strain will not prove as satisfactory as other introductions.

THE BABY PRIMROSE
(Primula Forbesii)

Wonderfully free-blooming plant, to flower as soon as borne. Flowers of a delicate rose-like, with eye of pale gold; produced in great abundance. Price, 10 cents each, three for 25 cents.

Ever-blooming Primula Obconica

OBCONICA GRANDIFLORA—Flowers pure white.
OBCONICA CARMINEA—Color deep cerise-pink.

Price, nice plants of either variety, 15 cents each; two for 25 cents; $1.25 per dozen; postpaid. Large plants, either variety, 25 cents each; two for 40 cents; $2.00 per dozen.

Five Best STANDARD PRIMROSES

PRIMROSE ALBA—Flowers pure white, the foliage green.
PRIMROSE RUBRA—Purplish-red, white eye.
KERMESINA SPLENDENS—Bright carmine, yellow eye.
COCCINEA—Bright red, large flowers, beautifully fringed.
STRIATA—Flowers white, striped and blotched purple-red.

Price, any variety, nice plants, 10 cents each, the five for 40 cents.

McGregor's Improved WINTER-FLOWERING GERANIUMS
As illustrated in color on back of cover.

RADIANCE—Flowers of dark soft red, tinted with scarlet and heavily shaded with maroon, very dark and rich and at the same time very bright, a beautiful variety.
WHITE PERFECTION—A pure white variety as free flowering as the single varieties; an excellent one for winter pot culture.
PINK BEAUTY—Extra fine large bold flowers of a beautiful salver-pink. A grand blooming sort and of great merit.
APRICOt—A variety with rich rose-salmon flowers shaded with apricot one of the best, flowers of immense size and excellent shape.
SENSATION—Another magnificent variety; trusses of enormous size, beautiful carmine-violet color, shaded rich violet, exceedingly free blooming.
FIREFLAME—Color dazzling scarlet, fine prominent truss.

Price, 15 cents each, any three for 30 cents, or the full set of 6 varieties illustrated in color for 50 cents, postpaid.

Bulbs for Late Planting

The "Wonder" Collection

65 BULBS (free, by mail) FOR 50 CENTS, AFTER NOVEMBER 1, 1910.

When placing our orders for bulbs, which we import from Holland, France, Italy, China, Bermuda, etc., it is impossible to estimate the demand, therefore we usually have a surplus of some varieties, even the finest and most expensive. As they cannot be kept over, we like to close them out at the end of the season; therefore we are able to offer you assorted collections at sacrifice prices. The "Wonder" Collection contains 65 good-sized sound bulbs, each variety wrapped separately and named, for 50 cents. This Collection cannot be sent until November. Order at any time, and we will forward the bulbs as soon as possible after the first week in November.

The "Surprise" Variety Bulb Collection

130 ASSORTED BULBS BY EXPRESS FOR $1.00, AFTER NOVEMBER 1, 1910.

Like the "Wonder" Collection, this is made up of fine, sound bulbs of choice varieties which are unsold when the rush of trade is over. But as the "Surprise Variety" Collection can only be sent by express at your expense, it contains a larger proportion of the heavier and more expensive bulbs, such as Hyacinths, Tulips, Narcissi, etc., of the finest varieties, each variety wrapped separately and named. Try it. They are worth four or five times the price we ask. A truly gorgeous display for $1.00. This collection cannot be sent until November. Order at any time, and we will forward the bulbs as soon as possible after the first week in November.

The "Surprise" Hyacinth Collection

30 HYACINTHS BY EXPRESS FOR $1.00 AFTER NOVEMBER 1, 1910.

Select Named Single Hyacinths

PRICE, YOUR SELECTION, 10 CENTS EACH

Single Hyacinths are much to be preferred to double ones. In the double Hyacinths, whereas the single florets are doubled, they are much farther apart on the stem, and therefore do not form nearly so handsome a truss as the single varieties where the trusses are much longer and fuller. We strongly advise the single instead of the double for both bedding and pot culture.

HYACINTH AZUREUS

Price, 4 cents each, 25 cents per dozen, $1.25 per 100.

GRAPE HYACINTH

This charming little gem should be found in every garden, in abundance. It has been termed the "Blue Lily of the Valley," and when planted in a mass with that sweet flower it does resemble it to some extent and forms a most fascinating combination.

BLUE—Price, four for 5 cents, 10 cents per dozen, 60 cents per 100.
WHITE—Price, three for 5 cents, 20 cents per dozen.

An odd and interesting variety, growing a foot or more high, producing spikes of claret-colored flowers, which are cut up into wavy filaments in such a way as to resemble purple feathers; perfectly hardy, and will grow anywhere. Price, 3 cents each, six for 15 cents, 25 cents per dozen.
EARLY TULIPS

Tulips are the most satisfactory of spring-flowering bulbs. They are extremely hardy and of easy culture, blooming as freely and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. One of the prettiest ways to plant them is in the sod next the foundation of the house, where they will come up and bloom year after year with no care.

HARDY GARDEN LILIES

SPECIAL NOTICE

Many of the finest Lily bulbs come from Japan and are not received in this country until November. They cannot be obtained earlier, as the bulbs are not shipped until fully matured. Where bulbs are offered for sale earlier than the latter part of November, they are bulbs which have been kept in cold storage, and thereby have lost much of their vitality, and will not grow as well as fresh bulbs. Therefore, we advise the purchase of the Lily beds or borders early in autumn, covering them with four to six inches of leaves or litter of any kind. This will keep them open, and admit of the planting of the bulbs even if not received until December.

These beautiful plants for home decoration vie with the Rubber plants for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Fronds have a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Ferns of the Pteris family, which are best for the house, do as well as the Sword Ferns. The Nephrolepis family, of which the best-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed for indoor growing or for ferneries for table decoration. Ferns should be planted in a good light soil with some sand and leaf mold added, give good drainage.

### Nephrolepis Exaltata Bostoniensis (The Boston Fern)
This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 10c each; larger plants, 25c and 50c each.

### Nephrolepis Scottii
It is a condensed form of the Boston Fern, with characteristics not evident in the parent, an average plant in an eight-inch pot having 200 fronds. The fronds average about twenty inches in length and three inches in width at the widest point, being more finished than the parent. Price, nice young plants, 15 cents each; larger size, 25 and 50 cents.

### The Plumed Scottii Fern (Nephrolepis Scholzelli)
The ideal plumed Fern, holding the same position to all other plumed varieties that Scottii holds to the old Boston. It is a sport from Scottii possessing all the merits of that most popular variety, but with the pinnia subdivided, giving it an airy, feathery appearance. Price, nicely shaped plants, 50 cents each.

### The Springfield Fern
Offered for the first time. A valuable Fern, especially for vases, baskets, and box work; of very erect growth, the fronds more stiff than the Boston, and similar to the Boston in a vigorous growing variety and we believe will prove very popular. Price, nice young plants, 15 cents each; strong plants, 35 and 50 cents.

### Nephrolepis Piersoni (Ostrich Plume)
An entirely new form of Boston Fern. The pinnia subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful, feathery, plumy, nothing describes them better than "Ostrich Plumes." Price, nice young plants, 15 cents each; larger plants, 25 and 50 cents.

### Nephrolepis Piersoni Elegansissima or Tarrytown
This is a sport from the Piersoni Fern; the plant is of much more compact habit, one-half as tall, but with the fronds nearly twice as wide, making it a much more desirable plant for all purposes. Price, nice young plants, 15 cents each; larger plants, 25 and 50c each, postpaid.

### Nephrolepis Superbissima
The latest improvement in this family of Ferns, unique in foliage, quite different from all other varieties of this family, standing in a class by itself. It makes a dwarf, compact growth similar to the Scottii Fern, the fronds, however, being more dense, firm and rigid, and the foliage several shades darker than any other Fern coming from the Boston type. Price, nice young plants, 15 cents each; strong plants in 4-inch pots, well established, 25 cents each.
